

Read this before setting the tiles

- Before start setting the tiles, check if the product identification, quality, and shade, are the same in all boxes. It will be not accepted complains after the settings.
- Weight, tone, and measures are subject to variations, normally cause by the ceramic process.
- Make plans of distributions in the wall to be set, through paging of the decorated and plains tiles, in accordance with ratios contained in the boxes.
- Check the quality of wall to be set. It must be aligned, plummeted without dirt, fungus, or untied pieces. It must be dried. without fissures, grooves, or hollows. It must be prepared in agreement with the International Technical Norms of Construction.
- Check if there are dilation joints on the structure.
- Check if the quantities of products are enough, besides for cutting, finishes and future reform.
- Use cement of good quality adjusted to the type of surface and place (internal/external). Prepare the cement in agreement with the manufacturer recommendation.
- Don't use metallic tools to hit the pieces.
- Apply the cement of joints with a spatula made of rubber, 72 hours prior setting the tiles.
- In case of colored joint, check if the pigment isn't soluble in water, or else it can stain the pieces.
- Minimum joint recommended: 3 mm among pieces.
- Clean the pieces, soon after the application; to avoid adherence of the cement.
- To clean the pieces, use a wet cloth with soap or alkaline detergent: never use abrasive materials.
- Never dive or get wet ceramic pieces before use them.

IMPORTANT: Safety Recommendations for Cutting and Installing Materials Containing Silica. Wet cutting or the score and snap method is recommended during the installation process. Dry cutting and improper installation techniques may expose the installer to harmful silica dust if inhaled. Do not dry cut the material using power tools during the installation process. Using dry cutting methods could present a risk of acute lung injury. If adequate ventilation cannot be achieved, wear a mask or respirator at all times.
